2023 – Learn JMeter By Examples

Session 3 – Start Your First Project

Performance TEST LabCN @DanielLovePerf

31th March, 2023

APACHE
JMeter™

Content

Create Script Step by Step:

- Go through Test Plan structure

- Create all elements step by step

- Add HTTP Samples for accessing Apache JMeter official site

- Add Variables for hostname and homepage_tag(if) then do replacement
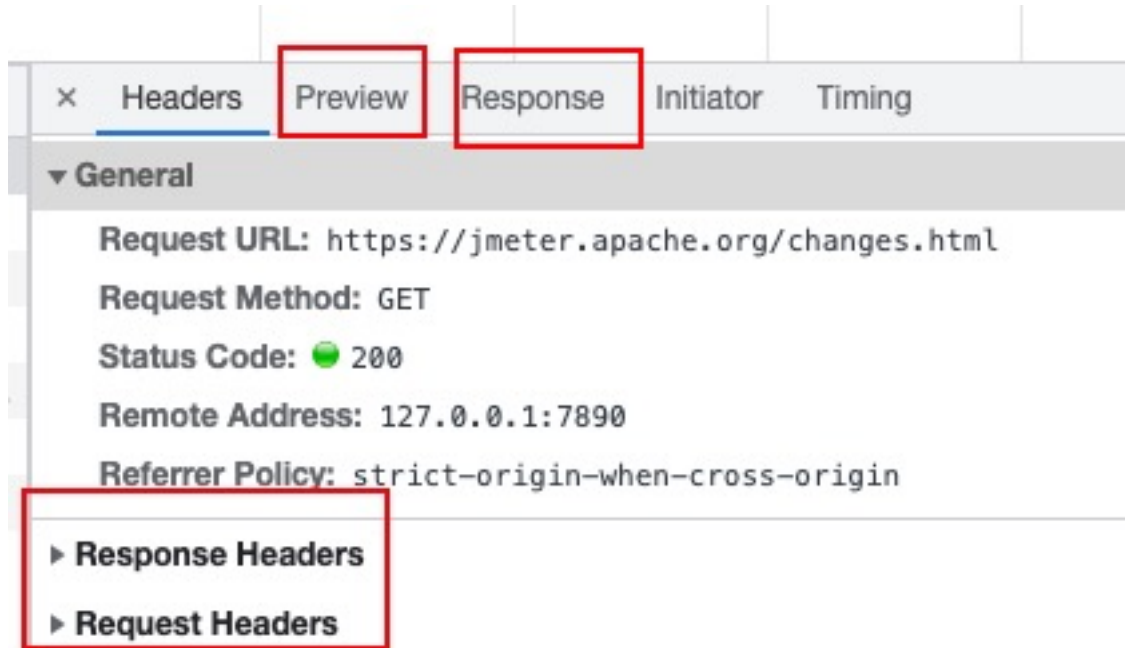

Run Script with Different Scenarios:

- Run ThreadGropu with 2 Threads and 2 loops

- Check execution sequence for the 3 Thread Groups

- Check View Result Tree – Boundary Extractor Tester

- Check 'Debug Sampler'

- Try to disable 'HTTP Header Manager'

- Try to uncheck 'Clear cache each iteration'

- Try to change the 'homepage_tag' to false

- Try to check 'Generate parent sample'

- Check Request Data, Response Data and Headers

- Check each listener

First JMX Script
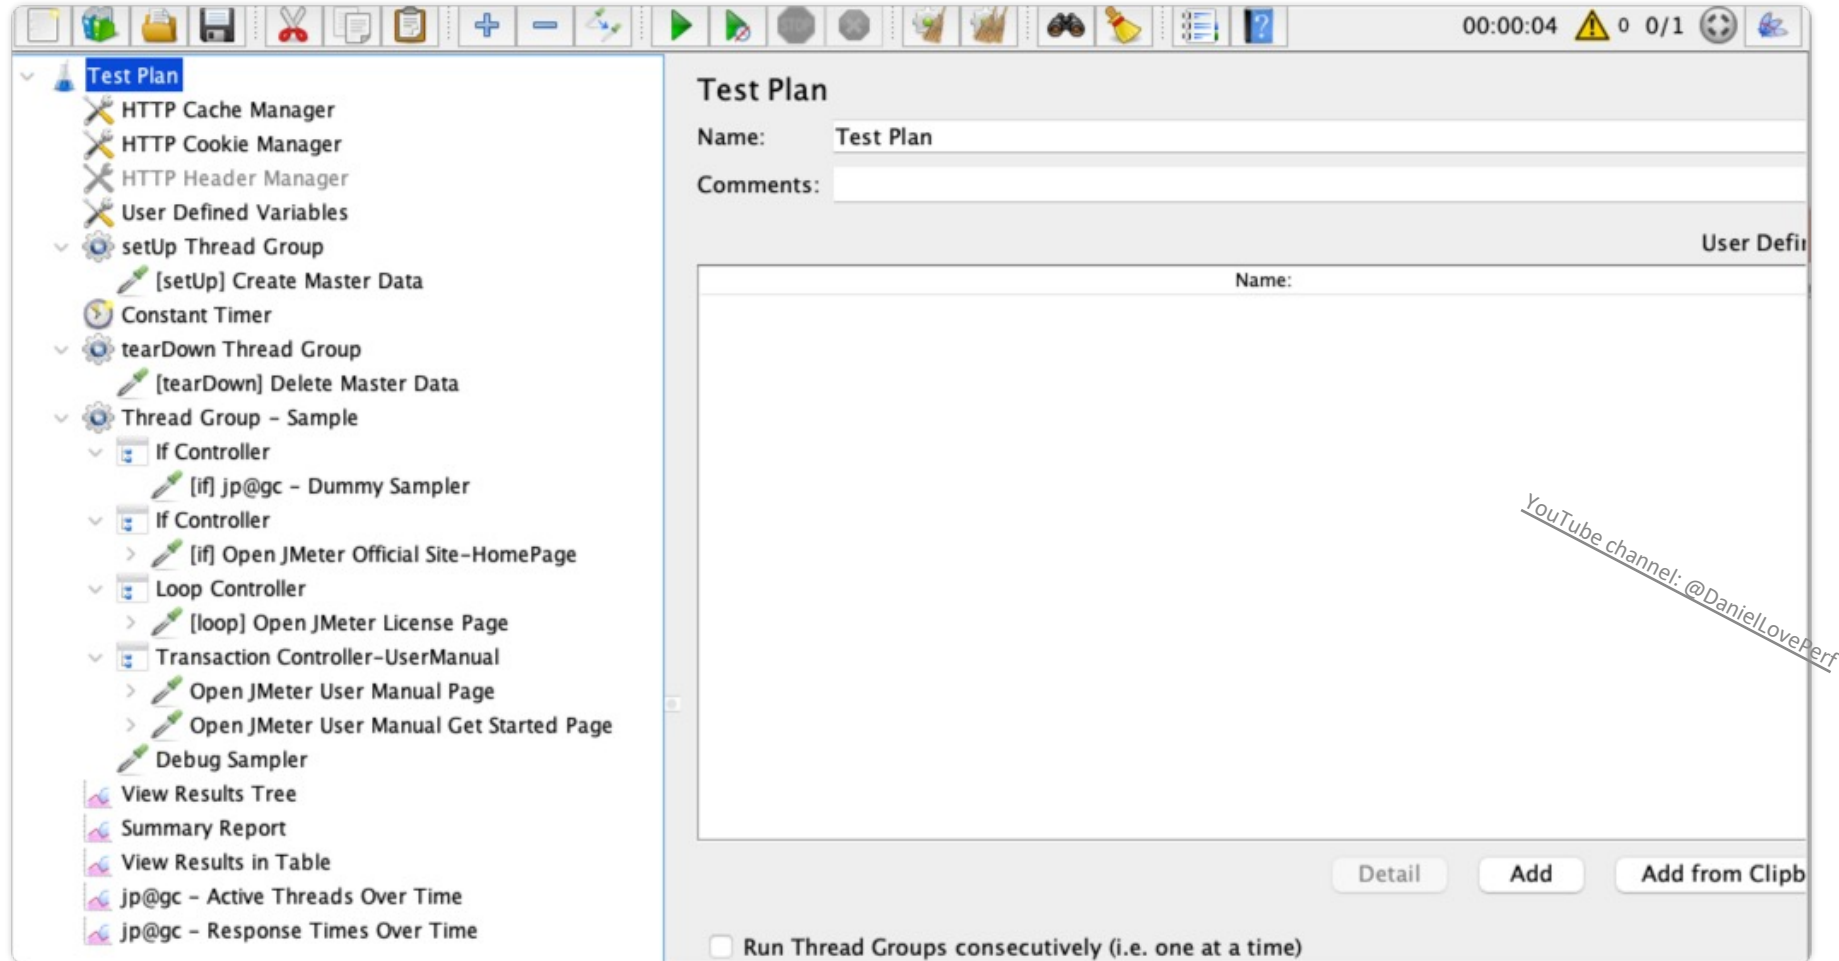

Notes: You can download all scripts from my Github repo

If The Request is Correct in JMeter ?

Next Session: Main KPIs
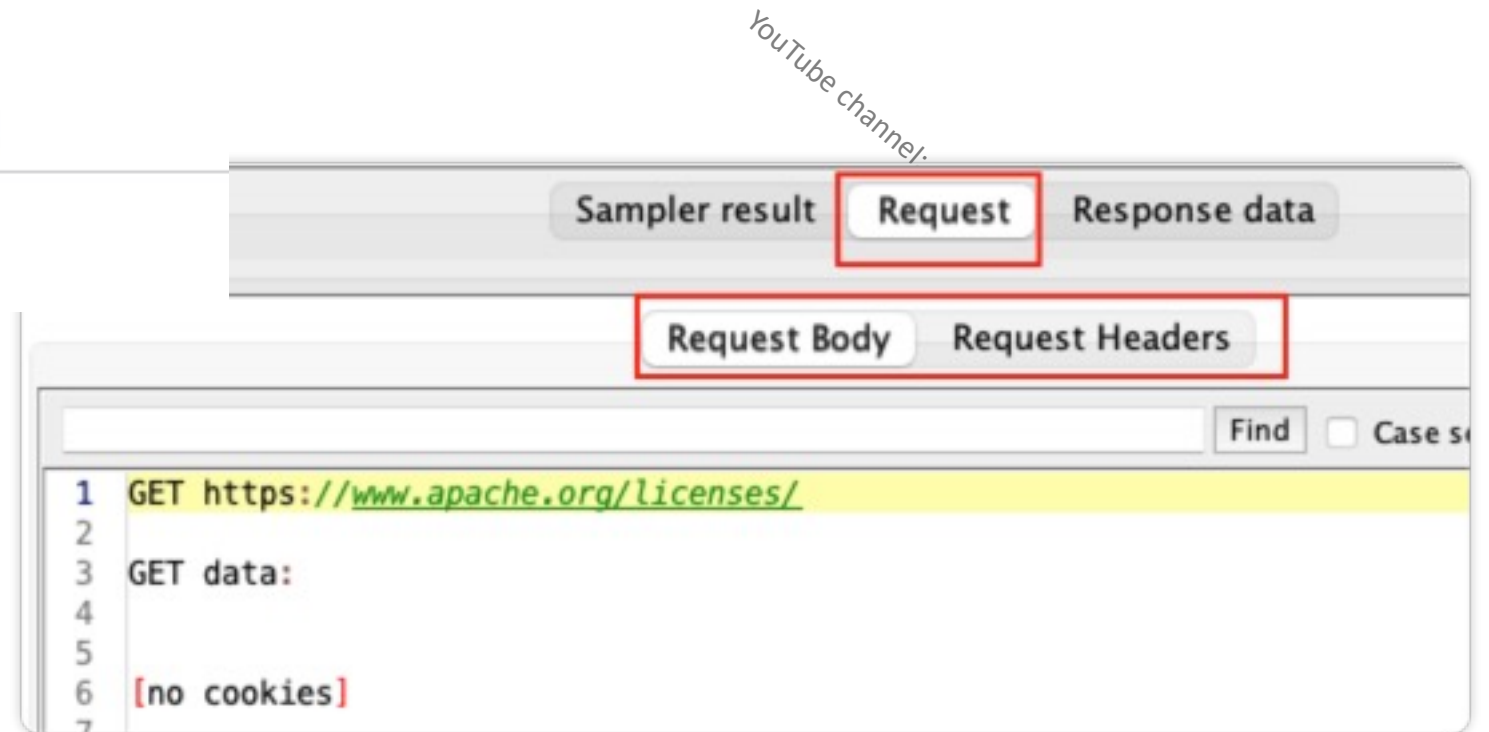

Thank You!
